Faan to Points Conversion Sheet

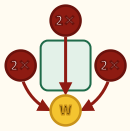

What every hand pays in the Hong Kong Mahjong app: win on a discard, self-drawn win, and Pro Table penalties.

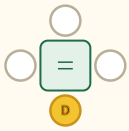

Win on a discard 出銃

The player who discarded your winning tile pays it all (全銃): 4 × base. The other two pay nothing.

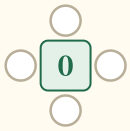

Self-drawn win 自摸

All three others pay 2 × base each: 6 × base in total. The self-draw's +1 faan is already in your faan count.

Dealer 莊家

No dealer bonus in Hong Kong rules. The dealer wins and pays the same (莊家一樣大小).

Draw 流局

The wall runs out and nobody wins: nobody pays.

Faan	Base	Win on a discard · 出銃			Self-drawn win · 自摸		
		Winner	Discarder	Other two	Winner	Each other player	
0	1	+4	−4	0	+6	−2	
1	2	+8	−8	0	+12	−4	Beginner tables only

10+	128	**+512**	**−512**	0	**+768**	**−256**	**Maximum (爆棚): 10 faan or more**

Look up the hand's total faan, self-draw included. Anything above 10 faan pays as 10.

Fouls & penalties

Pro Table (高手場) follows the Hong Kong Mahjong Association tournament rules. At Beginner and Advanced tables the app blocks invalid calls, so these never come up there.

−512 **False win** 詐糊
Declaring Win without a legal 3-faan hand. Nobody wins the hand and the same dealer replays it.

−96 **Red card** 紅牌
A second yellow card. A second red card counts as a false win.

— **Passed tile** 過水
Let your winning tile pass and you can't win on that tile from a discard until your next draw.

−24 **Yellow card** 黃牌
An invalid or changed call, a kong straight after a pung or chow, discarding out of turn, or missing the 7-second turn.

— **Dead hand** 禁糊
After discarding out of turn (one tile short, 小相公) or a missed turn: no calls and no win for the rest of the hand. You can still deal in.

— **Timeouts** 超時
Three timed-out hands in a row in a match hand your seat to a bot.

Claiming a discard: Win beats Kong and Pung, which beat Chow. Only one player wins per discard: if two can win, the one next in turn after the discarder takes it (截糊).
